

This file is not your code. Your door code is a QR code that House of Gains sends you by email. If you bought a pass, it arrives within about a minute of checkout in a message titled **"Your House of Gains day pass is ready."** If it isn't in your inbox, check spam.

Three steps at the door

1 Open the code on your phone.

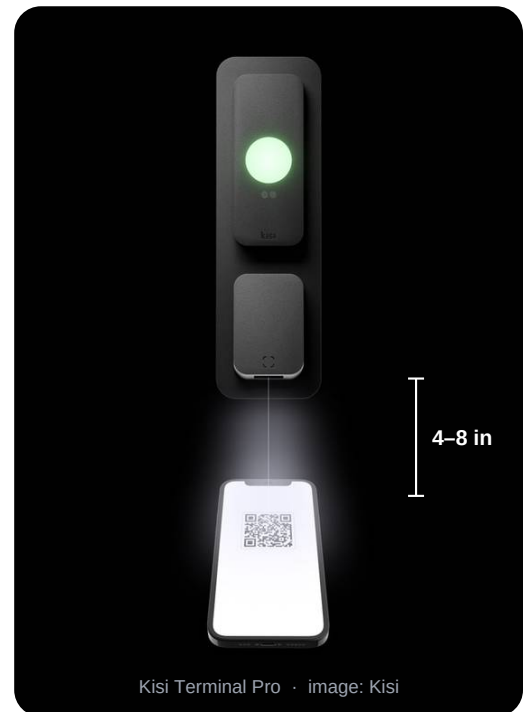

It's in the email and also attached as an image, so you can save it to your photos. Turn your screen brightness up. A light background scans best.

2 Hold your phone 4 to 8 inches below the reader.

Aim for the spot under the blinking light on the Kisi Terminal at the entrance. Hold it still and flat, facing the reader.

3 Wait for the green flash.

When the reader flashes green, the door is unlocked. Pull it open and you're in.

Good to know

Every code has an end time.

The email that carried your code says exactly when it stops working. A pass starts the moment you buy it, not at your first scan and not at opening time. A 1-Day Pass runs 24 hours from checkout; a 2-Day Pass runs 48.

More than one code means more than one person.

Codes bought together all start and end at the same time. Five 1-Day Passes get five people in for the same 24 hours; they don't add up to five days for one person. Need longer? Buy the longer pass.

One code, one person.

Anyone holding a code can open the door until it expires, so send each code only to the person it's for. Each one is attached to the email as its own image to make that easy.

If the reader doesn't catch it

- Brightness all the way up, and hold the phone still, 4 to 8 inches below the light.
- Move out of direct sun or glare. Wipe the reader if it looks smudged.
- Code expired? Your email says when it ended. A new pass sends a fresh code.
- No email after a few minutes? Check spam, then reply to your order confirmation or contact the gym.
